Methodology

Results in this report are based upon questions asked in the UMR Research nation-wide omnibus survey. This is a telephone survey of a nationally representative sample of 750 New Zealanders 18 years of age and over.

Fieldwork was conducted from the 2nd to 6th July 2009 at UMR Research's national interview facility in Auckland.

The margin of error for sample size of 750 for a 50% figure at the '95% confidence level' is $\pm 3.6\%$.

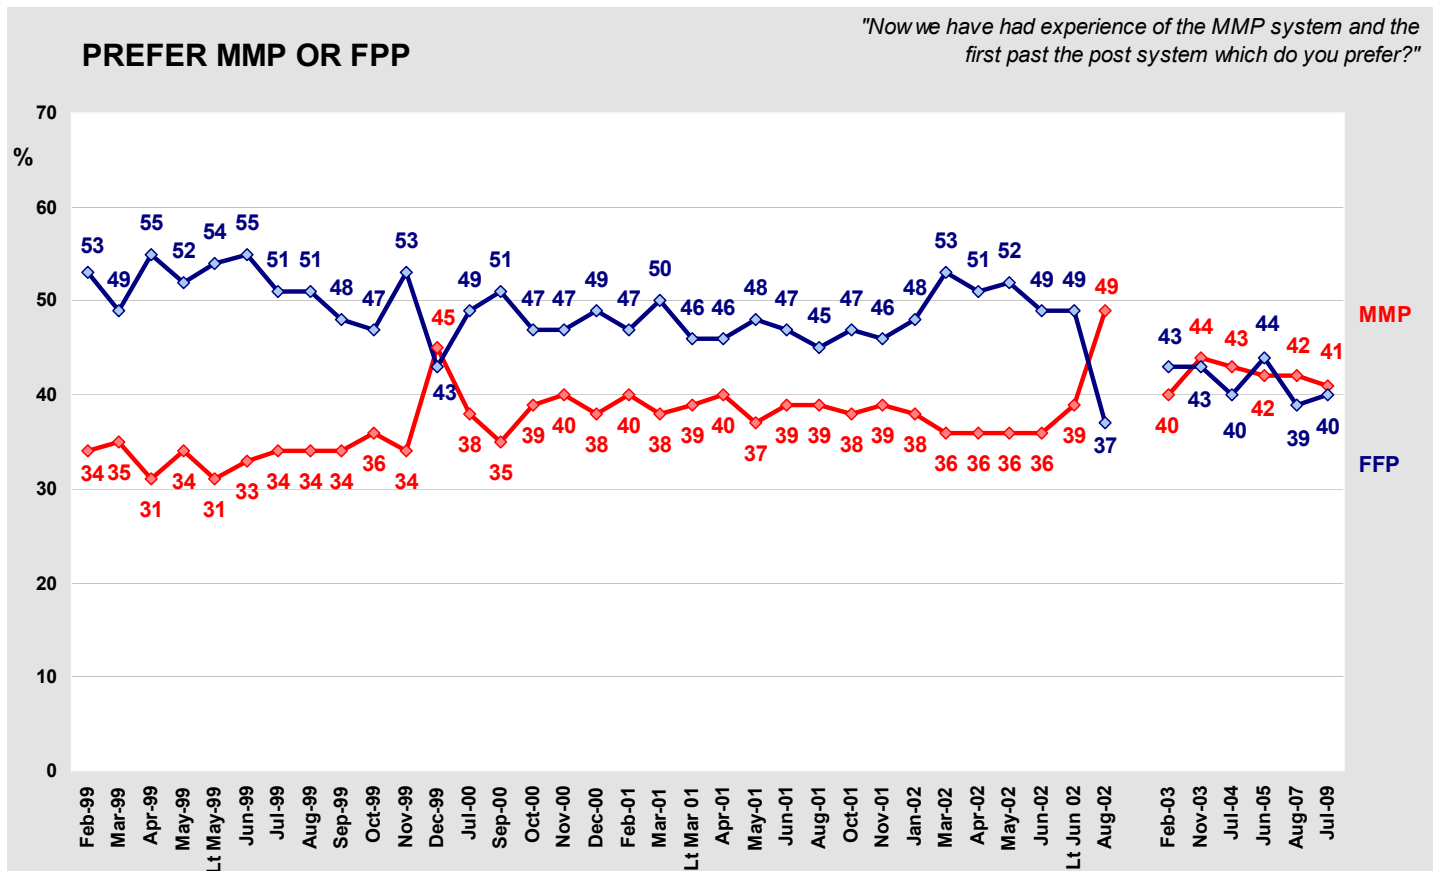

MMP vs FPP

Support for the MMP and FPP voting systems continued to be relatively even.

41% said they prefer the MMP voting system, while 40% said they prefer FPP. 19% were unsure or had no preference. These figures were relatively unchanged from 2007, when 42% preferred MMP and 39% preferred FPP.

Support for each voting system varied across several demographics:

- Wellingtonians heavily favoured MMP over FPP 58% to 32%.
- Those in provincial or rural areas were slightly more in favour of FPP.
- Support for MMP decreased with age. Those aged under 30 favoured MMP over FPP 43% to 18%. Those aged 60 plus were much less supportive, 36% to 56%.

Impact of MMP

Opinions on the impact of MMP on the quality of Government were fairly split.

A third (32%) said the MMP voting system has had a positive impact (7-10 on a 0-10 scale where 10 means 'very positive') while 37% had a neutral opinion (4-6 on the scale) and 24% said it has had a negative impact (0-3 on the scale).

These figures were similar to those in 2007, however slightly more people now believe MMP has had a negative impact.

As you may be aware, New Zealand has had MMP Governments since 1996. Using a 0 to 10 scale where 0 means very negative and 10 very positive, what impact do you think the MMP voting system has had on the quality of Government in New Zealand over this period.

	AUG 07 %	JUL 09 %
10 – Very positive	3	4
9	2	1
8	10	13
7	17	14
TOTAL POSITIVE (7-10)	32	32
6	14	12
5	19	15
4	10	10
TOTAL NEUTRAL (4-6)	43	37
3	6	10
2	5	5
1	1	3
0 – Very negative	7	6
TOTAL NEGATIVE (0-3)	19	24
Unsure	6	7

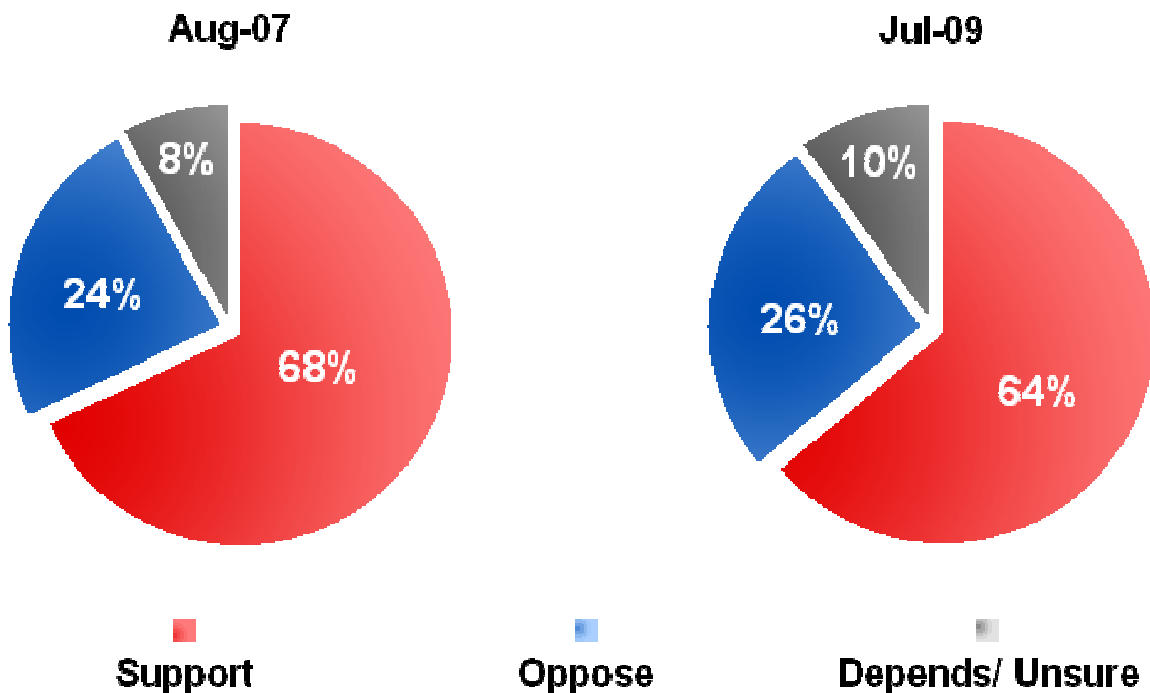

MMP Referendum

Most respondents continue to support a referendum on whether we keep or change the MMP voting system.

64% declared they support a referendum while 26% oppose it. These figures were similar to those recorded in 2007 (68% support, 24% oppose).

Males were slightly more supportive than females (66% and 61% respectively). Wellingtonians were the least supportive (54%) compared to other areas.

Regardless of your views on MMP, would you support or oppose a referendum on whether we keep or change the MMP voting system?

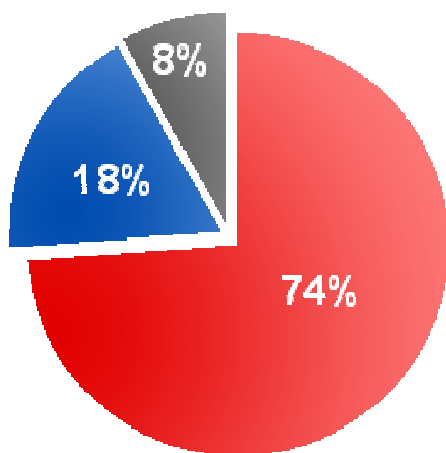

Reducing Number Of MP's

A solid majority of respondents favoured reducing the number of MP's in the house from around 120 to 100. 74% declared support for this notion, while just 18% were opposed. 8% were unsure.

Support increased with age, from 71% amongst those under 30 to 80% amongst those aged 60 plus. Support was also higher amongst blue collar workers (85%) and retirees (82%) compared to white collar workers (70%).

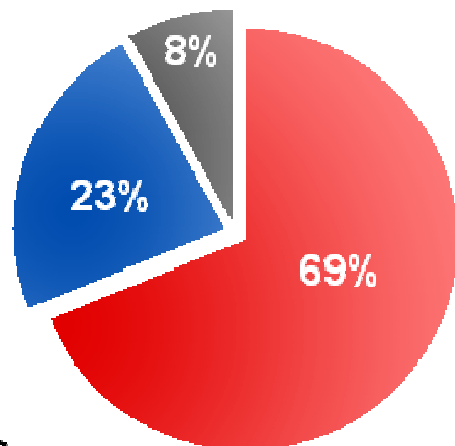

Of those who supported reducing the number of MP's, 69% declared they would continue to support it even if it meant the representation of parties would no longer be proportional. 23% said they would change their mind while 8% were unsure. The equivalent numbers as a percentage of the total sample (n=750) were 51% support, 17% oppose and 6% unsure.

Do you support or oppose reducing the number of MP's from around 120 to 100?

Support
Oppose
Depends/ Unsure

Would you support reducing the number of MP's by 20 if it meant that the representation of parties in the House would no longer be fully proportional?

Yes
No
Depends/ Unsure

Base: 74% of respondents, those who support reducing number of MP's to 100, n=555
